## OBJECTIVE

Seeking internship opportunities in AI, Software Development, and Full Stack Development to apply technical skills, build impactful projects, and gain industry experience.

---

## SKILLS

**Technical Skills:** Python, HTML, CSS, JavaScript

**AI / Machine Learning:** NLP, OpenAI API, Speech Recognition

**Frameworks, Tools & Libraries :** Flask, Git & GitHub, scikit-learn, pytsx3

---

## EDUCATION

**B. Tech - Electronics and Communication Engineering**

2023

Vardhaman College of Engineering

Hyderabad, Telangana

**Intermediate, CGPA: 8.45**

2023

Narayana Junior College

Hyderabad, Telangana

**SSC, CGPA: 8.36**

2021

Kendriya vidyalaya

Hyderabad, Telangana

---

## CERTIFICATIONS

MATLAB Onramp | NPTEL Data Science | GitHub Actions | TCS iON Career Edge | Django Web Development | Programming in Java

---

## PROJECTS

- RoadMate App: Developed Android app using Java and Python for driver hiring, assistance, and GPS navigation.
- CPU Cooling System Using Arduino: Built automated cooling system using Arduino sensors to monitor temperature and reduce overheating.
- AI Resume Screening System: Built AI-powered ATS resume screening web app using Python and Flask with NLP-based job description matching and ATS score calculation. **GitHub:** [github.com/Manvika-04/AI-Resume-Screening](https://github.com/Manvika-04/AI-Resume-Screening)
- Ultimate AI Voice Assistant: Developed AI voice assistant using Python and OpenAI API with wake-word detection, speech recognition, and automation features. **GitHub:** [github.com/Manvika-04/Ultimate-AI-Voice-Assistant](https://github.com/Manvika-04/Ultimate-AI-Voice-Assistant)
